PROFESSIONAL SUMMARY

Full Stack Web Developer with 4+ years of development experience building distributed applications for web deployment using MERN Stack. Strong proficiency with web services technologies and APIs like Restful, Cloud technology (AWS) for Micro Services. Possesses a track record developing web applications with expertise in object-oriented programming; developing, testing and debugging code; designing interfaces; and networks.

TECHNICAL SKILLs:

Languages	JavaScript, Type Script
Web Technologies	ReactJS, Bootstrap, NodeJS, CSS3
Libraries/Frame Works	jQuery, React-Hooks, React-Redux
Build Tools	NPM, Docker
Application Servers	NodeJS, Express.js
Cloud	AWS certified, MongoDB Atlas
Web Services	SOAP, REST, MuleSoft certified
Databases	RDBM: MS SQL Server and MY SQL NO SQL: Mongo DB and Apache Cassandra
Scripting languages	JavaScript, JSX
Version Control	Git, GitHub and Bitbucket

PROFESSIONAL EXPERIENCE

Software Engineer   May **2019 - Present**
Nilecode, Brooklyn, NY
International multi-services provider for web/software solutions

- Undertook SDLC requirements gathering, analysis, design and development with AGILE/Scrum
- Created single page applications in loading multiple views using route services to create a more dynamic user experience utilizing React JS framework and Node JS
- Implemented React Router component for navigations; connecting the web application to back-end APIs
- Used React JS to create views to hook up models to the DOM and synchronize data with server as a Single Page Application (SPA) and used React-Redux thunk to make REST API calls
- Built back-end RESTful APIs using Microservices architecture in Node JS

Full Stack web Developer   March **2017 - April 2019**
Yoddel, New Jersey

- Developed features for the company's CRM (Customer Relationship Management) application using React, NodeJS, and MongoDB
- Used JavaScript features such as Parallel operations on collections, multithreading and for effective sorting mechanisms and streams to store and process data
- Designed a system based on spring MVC Model architecture and developed a business logic layer
- Designed and developed components relating to concept wave projects
- Created and updated database objects and deployed it into AWS using EC2 instances

EDUCATION

Full Stack Web Development Certificate   **2019**
Rutgers University, NJ

Bachelor of Science (BS), Electrical Power Engineering,   **2014**
Future University, Cairo, Egypt
www.fue.edu.eg
Future University is one of the best private universities in Egypt

PROFESSIONAL DEVELOPMENT

Amazon Web Services Certified Cloud Practitioner
 MuleSoft Certified Developer
